PROFESSIONAL SUMMARY

Full-stack developer with skill JavaScript in developing and designing .UI based applications. Hands on experience in C#, ASP.NET, MS SQL (NodeJs, MongoDB, GraphQL, HTML and CSS). Have deep understanding of digital transformation solutions. I'm looking for a work environment where I can explore the horizon of Software Development and refine my knowledge base via real-world implementations.

PROJECT

My E-Commerce WebSite-Using open source technology for electronics product where customer will be able to buy product online.

The design application will have an admin view and the public guest view. The admin view is meant for the administrator to update the product, change price, remove and add product and also manage customer.

DOMAIN : E-Commerce .

TECHNICAL SKILL

- Single page web application being developed with C#, ASP.NET, HTML, CSS
- JAVASCRIPT & MY SQL.

PROJECT

SHARE DESK:-Desktop sharing software works by sending packets of information from a host Computer to a remote computer describing what's on the host computer's screen at any given time. The encrypted data travels over the network.

OBJECTIVE

- There are several objectives in desktop sharing system some of these are as follow
- Broadcast all or a cropped portion of your desktop to everyone in your room.
- Users can see the broadcaster's mouse cursor.
- Broadcast image will be auto-panned for users with smaller

Smaller screens or lower screen resolution.

TECHNICAL SKILL

- Single page web application being developed with JAVA & MY SQL.
